

'Bee' come a Citizen Scientist

Discovering biodiversity with molecular biology

Join BeeCode in identifying
Honeybee subspecies in Berlin

SAVE YOUR
SPOT!

5 day DNA barcode workshop:

FREE

- Practical laboratory methods – DNA extraction, amplification and electrophoresis
- Use of advanced DNA sequencing
- Computational biology – DNA mapping and phylogenetic analysis

Registration is FREE but with limited places

Open to: Students from 11th grade upwards
Course language: English

 3 rounds of workshops
Between 21 Oct – 01st November 2024

 Schiller-Bibliothek, Müllerstraße 149, 13353 Berlin

What do you get?

- Certificate of participation
- Scientific data authorship
- Hands-on experience with real scientific experiments
- Free access to DNA sequencing

Why does it matter?

One-third of our food supply is
pollinated by bees!

The genetic diversity of bees is crucial
for their adaptation to climate
challenges and for sustaining the
natural habitats we cherish

REGISTER NOW!
until Sept 30th
